### *Phragmipedium Andean Fire*

A primary hybrid within the genus *Phragmipedium* which is found in Central and South America.

There are roughly 30 species in the genus.

A cross of *Phrag. besseae* (from Peru & Ecuador) and *Phrag. lindleyanum* (Guyana & Venezuela).

The discovery of the deep red *Phrag. besseae* in 1981 is widely regarded as *the* orchid discovery of the 20th century.
